Hybrid Scenarios

Private Cloud, Public Cloud and on Premise

The xSuite Group Cloud Strategy

Cloud first –
not Cloud only

Enablement of
hybrid scenarios

Advantages available
to customer
organizations

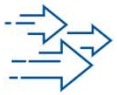
xSuite Portfolio

Why our customers transition to xSuite Subscription

Product Innovation | Value | Scalability | Flexibility | Service | Economics

More value today

- **Future-proof** Always receive latest certified **innovations & upgrades**
- Exclusive **features only available under subscription** (e.g., Prediction Server (AI))



More value tomorrow

- **Support your Cloud journey** in AP automation with our SaaS offerings in a hybrid model
- **Unlock latest** S/4HANA and other SAP releases only under subscription
- New **features only available under subscription** (e.g., Reporting API)

More flexibility

- **Easily upscale to new** products and add-ons along AP value chain
- **Upscale any time** based on increased usage (e.g., new facilities, new subsidiaries, M&A, divestures)

More value realization

- **Increased service support along your journey,** e.g., through a customer success team
- Develop a **closer partnership** with xSuite
- Access to **Global Managed Services**

Less upfront costs

- **Positive ROI from Day-1**
- **Less upfront cash-out** needed at contract closing frees up cash-flows
- **No excess payment** but based on usage with transparency on price adjustments
- **Improve finance forecasting** by better predictability of future AP document needs
- **No longer significant write-offs** enabled by operating expenditures

2024 xSuite Group - Private & Confidential

How you can used the hybrid Scenarios
